

CYBERSECURITY PROJECT REPORT

WEEK 2 • PROJECT MODULE 1

Footprinting & Reconnaissance with Multiple Kali Linux Tools

Prepared by

HAMZA AHMAD

Cybersecurity Internship • Cohort B083

Target	networkwalks.com
Environment	Kali Linux (Virtual Lab)
Assessment Type	Footprinting / Passive Reconnaissance
Project Date	17 September 2026

Educational / Authorized Security Testing

1. Executive Summary

This report documents a controlled reconnaissance exercise using Kali Linux to collect publicly observable information about networkwalks.com. The exercise covers domain registration, web-technology fingerprinting, DNS resolution, HTTP headers, WAF detection, and DNS record enumeration.

The original screenshots supplied with the project are retained as evidence. No screenshot has been cropped, retouched, filtered, or otherwise edited; only the report layout and display size have been adjusted.

2. Objectives

- Collect public domain-registration information with WHOIS.
- Fingerprint web technologies with WhatWeb.
- Resolve the domain and record returned IP addresses with nslookup.
- Review HTTP response headers with curl.
- Identify detected Web Application Firewall technology with WAFW00F.
- Enumerate publicly available DNS records with dnsrecon.
- Present the evidence in a professional security-report format.

3. Tools & Methodology

Tool	Purpose	Evidence
whois	Domain registration and name-server information	Figures 1–2
whatweb	Web technology fingerprinting	Figure 3
nslookup	DNS resolution	Figure 4
curl -I	HTTP response-header review	Figure 5
wafw00f	WAF fingerprinting	Figure 6
dnsrecon	DNS record enumeration	Figure 7

Scope: networkwalks.com only. The exercise is presented as an educational lab and should be performed only where the tester has authorization.

4. WHOIS — Domain Registration Information

Objective: Identify publicly available domain-registration, registrar, status, and name-server information.

Command: `whois networkwalks.com`

Observed result: The captured output identifies GoDaddy as registrar and lists HostGator/domain-control name servers, along with registration and expiry information.

Evidence

```
(kali@kali)~$ whois networkwalks.com
Domain Name: NETWORKWALKS.COM
Registry Domain ID: 2452319255.DOMAIN.COM-VRSN
Registrar WHOIS Server: whois.godaddy.com
Registrar URL: http://www.godaddy.com
Updated Date: 2025-11-12T10:08:43Z
Creation Date: 2019-11-06T22:51:46Z
Registry Expiry Date: 2027-11-06T22:51:46Z

NOTICE: The expiration date displayed in this record is the date the
registrar's sponsorship of the domain name registration in the registry is
currently set to expire. This date does not necessarily reflect the expiration
date of the domain name registrant's agreement with the sponsoring
registrar. Users may consult the sponsoring registrar's Whois database to
view the registrar's reported date of expiration for this registration.

TERMS OF USE: You are not authorized to access or query our Whois
database through the use of electronic processes that are high-volume and
automated except as reasonably necessary to register domain names or
modify existing registrations; the Data in VeriSign Global Registry
Services' ("VeriSign") Whois database is provided by VeriSign for
information purposes only, and to assist persons in obtaining information
about or related to a domain name registration record. VeriSign does not
guarantee its accuracy. By submitting a Whois query, you agree to abide
by the following terms of use: You agree that you may use this Data only
for lawful purposes and that under no circumstances will you use this Data

TERMS OF USE: The data contained in this registrar's Whois database, while believed by the
registrar to be reliable, is provided "as is" with no guarantee or warranties regarding its
accuracy. This information is provided for the sole purpose of assisting you in obtaining
information about domain name registration records. Any use of this data for any other purpose
is expressly forbidden without the prior written permission of this registrar. By submitting
an inquiry, you agree to these terms and limitations of warranty. In particular, you agree not
to use this data to allow, enable, or otherwise support the dissemination or collection of this
data, in part or in its entirety, for any purpose, such as transmission by e-mail, telephone,
postal mail, facsimile or other means of mass unsolicited, commercial advertising or solicitations
of any kind, including spam. You further agree not to use this data to enable high volume, automated
or robotic electronic processes designed to collect or compile this data for any purpose, including
mining this data for your own personal or commercial purposes. Failure to comply with these terms
may result in termination of access to the Whois database. These terms may be subject to modification
at any time without notice.

**NOTICE** This WHOIS server is being retired. Please use our RDAP service instead.
```

5. WhatWeb — Web Technology Fingerprinting

Objective: Fingerprint technologies and services exposed by the web application.

Command: whatweb networkwalks.com

Observed result: The captured output identifies Apache, WordPress, Bootstrap and other web/application fingerprints visible to the tool.

Evidence

```
(kali@kali) [~]
$ whatweb networkwalks.com | tee task2-whatweb.txt
http://networkwalks.com [301 Moved Permanently] Apache, Cookies[_wpdm_client], Country[UNITED STATES][US], HTTPServer[Apache], HttpOnly[_wpdm_client], IP[192.232.216.135], RedirectLocation[http://networkwalks.com/], UncommonHeaders[permissions-policy,x-redirect-by,upgrade,referrer-policy,x-endurance-cache-level,x-nginx-cache]
https://networkwalks.com [200 OK] Apache, Bootstrap[7.1], Cookies[_wpdm_client], Country[UNITED STATES][US], Email[info@networkwalks.com], Frame, Google-Tag-Manager, HTML5, HTTPServer[Apache], HttpOnly[_wpdm_client], IP[192.232.216.135], JQuery[3.7.1], MetaGenerator[WordPress 7.1,WordPress Download Manager 3.3.58], Open-Graph-Protocol[website], Script[4684NR-IPI86amp;pidnVar2=505116amp;pvtVar2=76amp;scvVar2=12,application/json,application/ld+json,module,speculationrules,text/javascript], Title[Networkwalks Academy], UncommonHeaders[permissions-policy,link,upgrade,referrer-policy,x-endurance-cache-level,x-nginx-cache], WordPress[7.1]
https://networkwalks.com/ [200 OK] Apache, Bootstrap[7.1], Country[UNITED STATES][US], Email[info@networkwalks.com], Frame, Google-Tag-Manager, HTML5, HTTPServer[Apache], IP[192.232.216.135], JQuery[3.7.1], MetaGenerator[WordPress 7.1,WordPress Download Manager 3.3.58], Open-Graph-Protocol[website], Script[4684NR-IPI86amp;pidnVar2=505116amp;pvtVar2=76amp;scvVar2=12,application/json,application/ld+json,module,speculationrules,text/javascript], Title[Networkwalks Academy], UncommonHeaders[permissions-policy,link,upgrade,referrer-policy,x-endurance-cache-level,x-nginx-cache], WordPress[7.1]
```

Figure 3. Original project screenshot — retained without editing.

6. nslookup — DNS Resolution

Objective: Resolve the domain name through DNS and record the returned addresses.

Command: `nslookup networkwalks.com`

Observed result: The captured result resolves networkwalks.com to 192.232.216.135 and shows an IPv6-mapped address.

Evidence

```
(kali㉿kali)-[~]  
$ nslookup networkwalks.com | tee task3-nslookup.txt  
Server:      192.168.43.1  
Address:     192.168.43.1#53  
  
Non-authoritative answer:  
Name:   networkwalks.com  
Address: 192.232.216.135
```

Figure 4. Original project screenshot — retained without editing.

7. curl — HTTP Response Headers

Objective: Inspect HTTP response headers without retrieving the full page.

Command: `curl -I https://networkwalks.com`

Observed result: The response returned HTTP/2 200 and exposes Apache, WordPress-related, cache, cookie and content-type headers.

Evidence

```
--(kali@kali)-[~]
--$ curl -I https://networkwalks.com
HTTP/2 200

```

Figure 5. Original project screenshot — retained without editing.

8. WAFW00F — Web Application Firewall Detection

Objective: Determine whether a Web Application Firewall is detected in front of the target.

Command: wafw00f networkwalks.com

Observed result: WAFW00F reports that the site is behind ModSecurity (SpiderLabs) WAF and records two requests.

Evidence

A terminal window on a Kali Linux system showing the execution of the wafw00f tool against networkwalks.com. The terminal has a dark background with colorful ASCII art at the top. The output text indicates that the site is behind ModSecurity (SpiderLabs) WAF and that 2 requests were recorded.

```
(kali@kali)~$ wafw00f networkwalks.com

  _____
 /            \
|              |

|  v2.4.2     |
|  The Web Application Firewall Fingerprinting Toolkit  |
 \            /
  _____

[*] Checking https://networkwalks.com
[+] The site https://networkwalks.com is behind ModSecurity (SpiderLabs) WAF.
[-] Number of requests: 2
```

Figure 6. Original project screenshot — retained without editing.

9. dnsrecon — DNS Record Enumeration

Objective: Enumerate publicly available DNS records including SOA, NS, MX, A, AAAA, TXT and SRV records.

Command: `dnsrecon -d networkwalks.com`

Observed result: The captured enumeration reports SOA, NS, MX, A/AAAA, TXT/SPF and SRV records, with 16 records found.

Evidence

```
(kali@kali)~$ dnsrecon -d networkwalks.com

Figure 7. Original project screenshot — retained without editing.

10. Consolidated Findings

Area	Key observation	Security relevance
Domain	Registrar and name-server information is publicly observable.	Supports infrastructure profiling.
Web stack	Web-server/CMS and related technologies are fingerprintable.	Useful for defensive patch and exposure review.
DNS	Multiple DNS record types are publicly resolvable.	Reveals hosting, mail and service relationships.
HTTP	Server and application-related headers are returned.	Headers can disclose implementation details.
WAF	ModSecurity (SpiderLabs) is detected.	Confirms a filtering layer is present.

11. Conclusion

The exercise demonstrates how reconnaissance tools can be combined to build a structured picture of a web-facing environment using publicly observable information. The collected evidence should be treated as reconnaissance data and used only within an authorized assessment scope.

12. Evidence Integrity Note

All seven screenshots embedded in the supplied project were reused as original picture files. No screenshot was cropped, retouched, filtered, or otherwise edited.

13. Authorization & Educational Use

This report is prepared for cybersecurity education and authorized lab practice. Testing systems that are not owned by the tester or covered by explicit permission should not be performed.
